

Problem

Given an amount and the denominations of coins available, determine how many ways change can be made for amount. There is a limitless supply of each coin type.

Example

$n = 3$

$c = [8, 3, 1, 2]$

There are **3** ways to make change for $n = 3$: $\{1, 1, 1\}$, $\{1, 2\}$, and $\{3\}$.

Function Description

Complete the `getWays` function in the editor below.

`getWays` has the following parameter(s):

- `int n`: the amount to make change for
- `int c[m]`: the available coin denominations

Returns

- `int`: the number of ways to make change

Input Format

The first line contains two space-separated integers n and m , where:

n is the amount to change

m is the number of coin types

The second line contains m space-separated integers that describe the values of each coin type.
